

The Human Being by the True Law

Raphael

In this month which is the first month of spring, nature orchestrates a prelude of love and the earth awakens in new hope. People in this modern age, however, are so deeply affected by the conflicts going on inside and outside of themselves that they have become impassive to the beauty and blessings of nature. On top of this, a wickedly cruel ideology known as communism which is strikingly similar to the Dark Ages of medieval Europe, together with the backward religious doctrines which brought on the Dark Ages in history, has ravaged the world of mankind like termites and is about to afflict their very bodies like some cancer.

In the Dark Ages, Satan Davide, overran the world and controlled the ignorant masses as he willed. Those of us in Heaven can give witness to this as a fact. In this day and age the deceased spirits of communists have banded together out of our reach after a mutual conflict which resulted in the loss of many souls, and are trying like fury to take the place of the deceased Satan, and are preventing mankind from developing wisdom.

Why is it that such evil spirits become so rampant as to cause another fight to death between the forces of good and evil? This could very well be a natural cycle in the universe. Even so, if you still truly desire to live in Heaven and seek to commune with God in eternal happiness and light, I will once more give you the following advice. The real human being which God loves, are those who do not lose their pure heart and those who serve the right master to make an effort on their own to become equals of God. One should reflect deeply on what it means to "become equals of God."

To give a simple example of this, it can be compared to the way

of life of the bushmen, or that of primitive tribesmen in South Africa who are known as the "hunters of Africa." There are few races which lead a more conscientious life as members of nature fully aware of their position of having to co-exist with animals and plants, or which are more fair and humble and close to God. The beauty in their hearts is something which has almost totally been lost in modern civilized people who are usually all caught up in their pride. It is true that the intellectual level of these primitive people is quite low and underdeveloped, but their spirits are worthy of the Kingdom of God. This is the kind of spirit that we seek most in you. There is no need to have an immature character which has strong dependency on others. Not one of the bushmen are foolish or egotistical, or become a burden on others. Even though they are uneducated they have wisdom which comes from living, and their spirits are in no way immature.

At times Heaven becomes uncertain as to what teachings are the most appropriate for those of you who are seemingly civilized, and what message will best reach you. Probably communist ideology in which there is no fear of God, and religious doctrines have caused people to become so blind as to lose their ability to choose what is right, have molded modern man into something which is far removed from the designs of Heaven. This is a very lamentable thing indeed.
