

The Celestial Realm and the True Law

Gabriel

I shall speak on the ideals of the Celestial Realm and the True Law in relation to those in Tokyo, Saitama, Kawasaki and Yokohama whose sentence of extermination of the soul was pronounced in the New Year Issue of *JJ* magazine.

A woman possessed by evil spirits because of her false self who had declared that she was of all things in spiritual union with El Lantie, seems to be telling everyone that Miss Yuko Chino is not the successor. We are getting very impatient at how often people are being fooled by the same tricks. These people singularly judge the Celestial Realm and Miss Yuko Chino as being too strict and resent not being understood or encouraged, and refuse to even take look at their false selves which are being reprimanded. They are people who may appear to be giving thought to why they gathered together in the first place, but in actual fact, they have not given this any thought at all.

If they felt that we were being too strict, why is it that they did not ask us why? This would be possible if their false selves were not so strong. How many times have we said that if you have questions you should read through the publications put out by the organization, and otherwise ask the organizers of meetings for the True Law and those of us in the Celestial Realm questions? The Celestial Realm and Miss Yuko Chino are not figures who rule over you with absolute authority. We are in a teacher-student relationship with you to walk the same path together.

Those who say that they do not understand why Miss Yuko Chino is so strict are those who cannot cast off their messianic belief system and prefer to be treated like little children. Those of us in the Celestial Realm who are known as gods were once living as human beings. We all once had the same problems, difficulties and faults as you have. Only after grinding and

polishing the jewel of our souls by our own efforts and spiritual strength, in addition to constant self-examination, we were able to attain this state worthy of being called gods. How can anyone who has not suffered just like you hope to have a proper understanding of you? This is the reason Jesus Christ spoke the words "God is with thee" and "let me take your burdens." Those who cannot understand this are unable to rid themselves of their messianic belief system, or are incapable of detecting their own false selves.

This is true because if God existed only as an absolute entity which accepted everything, good and bad, that would mean that all a person has to be is an immature child. As long as you are unable to become aware of this, evil spirits will continue to find their way into your heart. Evil spirits will thereby continue to reduce the number of followers of the True Law.

Evil spirits do not always say things which are incorrect. The aim of evil spirits is only to lead you in the wrong direction. That is to say, the words which they speak can be forty to fifty percent correct, while they will point you in the wrong direction with the remaining fifty to sixty percent. Those who are lacking in judgement just hear the first forty to fifty percent and think that the words come from the Celestial Realm, and let arrows loose to Heaven. There are even those who are fooled by just the first twenty or thirty percent. This is how Satan Davide, perpetuates his evil work.

What do you use as your standard of judgement? Are you sure that things are not just good or bad because of your subjective feelings? If things are judged to be good or bad just by your emotions, this is nothing more than subjectivity. You have to be able to judge whether something is one hundred percent correct and logical, and whether a teaching leads one hundred percent to the truth.

It is one hundred percent subjective emotions to think that

something is correct just because someone who is famous said so. This is where the pit fall lies for followers of the True Law who so easily give up their minds to the deception of evil spirits and turn against Heaven. Even though people ought to know that teachings from Heaven cannot be credited as being genuine until there is logical, literal and factual evidence to substantiate it, foolish traitors to Heaven in Tokyo are attempting to deceive people by pointing to so-called spiritual phenomena (where there was not even any argument raised). Those who are fooled by such cheap tricks cannot be called followers of the True Law who have read and understood the *Ji* magazine let alone this magazine, *Kibo-to-Ai-to-Hikari*. Evil spirits begin to prowl around a person from the time a person begins to slack off on reading these magazines.
