

How to Become a Follower of the True Law in the Real Sense

Gabriel

This month I shall deliver the message.

On many previous occasions those of us in the Celestial Realm have sent messages to you repeatedly. In order to make our policies and objectives more clear, I must register a few complaints in this month's message. This is something which I must clarify once again with the followers of the True Law as well as the readers of these publications.

Those of us in the Celestial Realm, for the purpose of creating a utopia or the Kingdom of God on earth have spoken through many different people in the past using a wide variety of methods, but to most of the people who live in this modern age, for some reason, even the appeal from the bottom of our hearts does not seem to have any substantial effect. Instead many people have come to regard the True Law as just another religion and some people have even lost their respect for those of us in the Celestial Realm and relate to us with an attitude no different than that for ordinary persons on the third dimension. There can be no greater dishonor to Miss Yuko Chino who is our spokesperson. (I already lodged a complaint about this to you previously in the April 1981 issue of *JJ* magazine.)

I must state unequivocally that it is an absolute outrage that people who are unable even to strictly keep a watch on their own false selves judge others as if there was no one on earth more in the right than themselves. These people only seem to become enthusiastic over heaping abuse on others, spreading unfounded rumors and interfering with other's business so as to relentlessly pursue counterproductive activity.

What was it that we have been teaching you people through the Kingdom of Heaven Series and these publications? Are you sure you have not just quickly flipped through these publica-

tions and thrown them aside to let them pile up somewhere? We would like to ask people like this: "why if you once read our words and understood them and realized the truth are you still unable to make any progress? Why is it that you have not found the freedom of spirit which you sought?"

Last December, in the Christmas issue, Jesus Christ stated as follows: "We are sending these messages which is as painful to us as coughing up blood." If you truly understand the significance of these words, you should have been able to speak and act with more warmth and consideration towards those of us in the Celestial Realm as well as Miss Yuko Chino.

Those of you who have forgotten why we are sending these messages in the first place must go back to the beginning and read over our messages once more. This is very urgent as the time left to us is getting shorter by the minute.

For the final portion of this message, I would like to reiterate my previous statement that "giving love to those without a stable foundation is like pouring water into a sieve," and this is my message for this month. Love is only given to those who are worthy of it. Only those who are able to walk the path strewn with rocks and lined with thorns while bearing the heavy burden of suffering, and those who are still able to keep sight of the path lit by the light of Heaven to continue making efforts are truly worthy of being followers of the True Law. Are you able to do this?

(April 20, 1982, Dictated to Mie Tanida through her clairsaudience.)
